

GIVE YOUR LIBRARY A FACE-LIFT.

WHEN IT COMES TO MAINTAINING YOUR LIBRARY, IT'S IMPORTANT TO CREATE AN ENVIRONMENT THAT'S WELCOMING, TIDY AND EASY TO NAVIGATE – FOR BOTH LIBRARIANS, AND VISITORS.

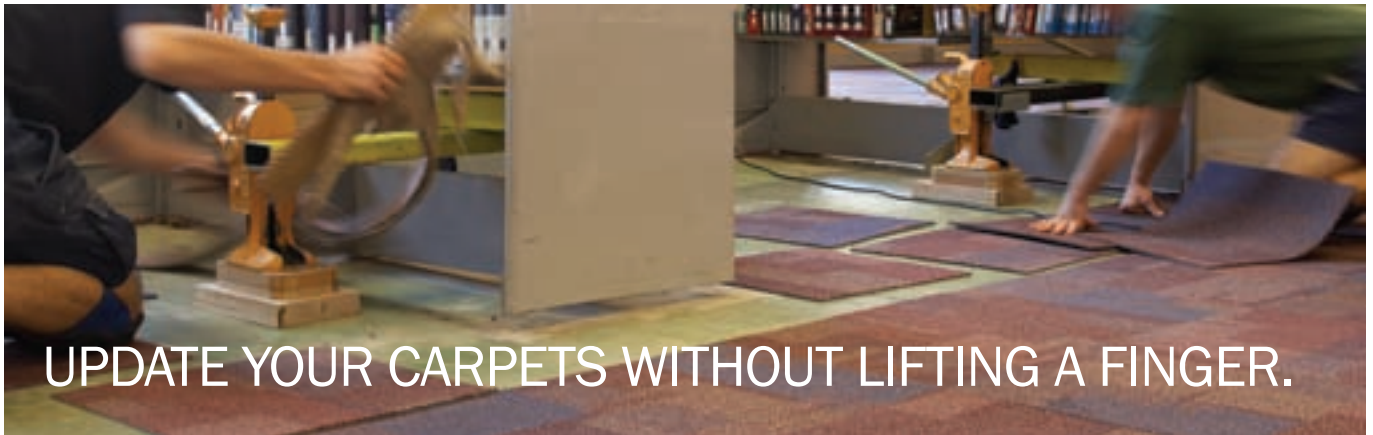

WITH MODULAR CARPET FROM INTERFACEFLOR®, YOU CAN GIVE YOUR LIBRARY A FRESH, NEW LOOK – WITHOUT ANY OF THE HASSLE OR EXPENSE THAT'S USUALLY INVOLVED IN UPDATING YOUR CARPETS. AND IMPORTANTLY, YOU CAN DO IT ALL WITH MINIMAL DISRUPTION TO YOUR MOST IMPORTANT ASSETS – YOUR BOOKS!

CREATE A NEW, ATTRACTIVE LOOK FOR YOUR LIBRARY, OVERNIGHT

Beautiful flooring from InterfaceFLOR can help you create a relaxed, peaceful atmosphere in your library.

By choosing from our wide range of attractive and stylish modular designs, you can differentiate and denote certain areas of your library - such as quiet study zones, or colourful children's areas - as well as provide visual cues to help people find their way around. Thanks to the modular design of our carpets, you can create several different environments within your library - and then easily update them if you need to.

UPDATE YOUR CARPETS WITHOUT LIFTING A FINGER.

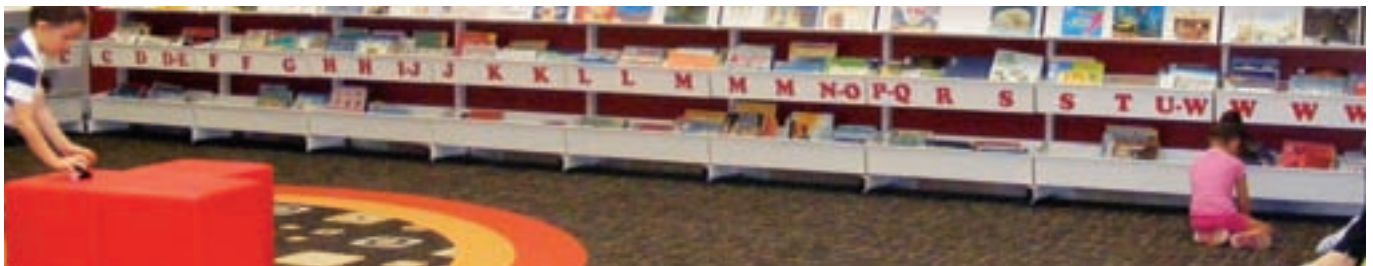

REPLACING THE CARPET IN YOUR LIBRARY IS INCREDIBLY EASY AND COST EFFECTIVE, THANKS TO OUR PATENTED RENOVISIONS® INSTALLATION SYSTEM.

Using a smart jacking system and skates, Renovisions allows us to lift up all your library furniture – including books, heavy shelves, tables or cataloguing systems – on the spot. Our expert technicians simply remove your existing broadloom or modular carpet, and replace it quickly and efficiently with your new InterfaceFLOR carpet.

This rapid installation means you can save significant amounts of time and hassle – and work can be done after hours, minimising disruption to your visitors and staff. It also means you don't encounter any of the time or costs typically associated with decanting books, dismantling shelves, cataloguing and storing, and then replacing books when your new carpets are installed.

We also provide you with complete project management from start to finish.

The modular design means individual tiles are simply replaced as needed – not the entire carpet. Unlike traditional broadloom carpet, there's no bubbling, wrinkling or split seams. In fact, we're so certain of the durability and resilience of our carpets, that all of our tiles come with a **comprehensive 15 year warranty**.

A SMARTER CHOICE FOR THE ENVIRONMENT.

When you choose InterfaceFLOR, you can also be confident your library is making a positive choice for the environment. As part of our commitment to preventing climate change, all our Australian made ranges are third party verified climate neutral under our Cool Carpet Program. Our Good Environmental Choice Australia (GECA) certification qualifies all our carpet for 100% Green Star points as "Environmentally Innovative" products. Furthermore our independent VOC Certification means more Green Star points and the assurance of no Indoor Air Quality issues. Every carpet within our range includes recycled content – and through our fully operational recycling program, ReEntry®, we also take back old carpet and turn it back into new carpet components, time and time again.

Visit www.interfaceflorglobal.com to find out about Mission Zero™ – our promise to eliminate any negative impact our company may have on the environment by the year 2020.

Mission Zero:
our promise to eliminate
any negative impact our company
may have on the environment
by the year 2020.
