

LIGHTEN THE COST OF CHANGE.

*Interface* **FLOR**

WHEN IT COMES TO MAINTAINING YOUR BUILDING ASSETS,  
YOU NEED SOLUTIONS THAT WILL KEEP YOUR TENANTS HAPPY,  
YOUR MAINTENANCE COSTS LOW, AND YOUR BUDGETS LIGHT.

With modular carpet from InterfaceFLOR®, you can easily give  
your buildings a fresh, new look – without the hassle or expense  
that's usually involved in updating your flooring.

In fact, comparative studies prove that our unique Renovisions  
installation system can actually cut your carpet replacement  
costs by up to 50%.

Plus, our carpet is durable, stain-resistant, and incredibly  
easy to replace – meaning it will deliver even greater  
return on your investment.

When you consider the benefits, it's no wonder countless  
businesses are turning to InterfaceFLOR.

## LESS DOWNTIME. LESS COST. LESS HASSLE.

Replacing flooring is incredibly easy and cost effective, thanks to our patented Renovisions Installation System. Using a smart jacking system and skates, Renovisions® allows us to lift up workstations and other office furniture –on the spot. Our specifically trained technicians simply remove existing broadloom or modular carpet, and replace it quickly and efficiently with InterfaceFLOR® carpet.

This simple, rapid installation means you can save enormous amounts of time and hassle. In fact, when compared with a traditional broadloom installation, the Renovisions system can even help you reduce your costs by up to 50%.

## RENOVISIONS® ALSO MEANS:

- Electrical and communications cabling can stay intact.
- There's no need to dismantle shelves or workstations.
- Disruption to tenants is minimised as work can be scheduled around business hours – either at night or over the weekend.
- There's no need for extra storage while carpet is replaced, and no temporary relocation costs.

Plus, our technicians will analyse your existing space, and deliver a customised program that works with your specific furniture, layout and fixtures. Throughout, you also benefit from having one point of contact, who will manage your refurbishment and keep you informed every step of the day.

## A SMARTER CHOICE FOR THE ENVIRONMENT.

When you choose InterfaceFLOR, you can be confident your business is making a positive choice for the environment. As part of our commitment to preventing climate change, all our Australian made ranges are certified climate neutral. And when you choose InterfaceFLOR modular carpet, you automatically receive 100% green star rating points for your building. Every carpet within our range includes recycled content – and through our fully operational recycling program, ReEntry<sup>®</sup>, we also take back old carpet and turn it back into new carpet components, time and time again.

Visit [www.interfaceflorglobal.com](http://www.interfaceflorglobal.com) to find out about Mission Zero™ – our promise to eliminate any negative impact our company may have on the environment by the year 2020.

## SO DURABLE, IT COMES WITH A 15 YEAR WARRANTY.

When it comes to maintaining your building assets, you need flooring which is durable, sturdy, and long-lasting.

InterfaceFLOR stands up to all the demands of a busy environment – yet is also easy to replace should it be damaged or worn. The modular design means individual tiles are simply replaced as needed – not the entire carpet. Unlike traditional broadloom carpet, there is also no bubbling, wrinkling or split seams – meaning occupational health and safety risks are minimised.

In fact, we're so certain of the durability and resilience of our carpets, that all of our tiles come with a comprehensive 15 year warranty.

*"I WAS EXPECTING THE RE-CARPETING OF THREE FULLY OCCUPIED FLOORS WITHIN ACCENTURE'S MELBOURNE CENTRAL LOCATION TO BE A MAJOR INCONVENIENCE FOR OUR STAFF. HOWEVER, AS A DIRECT RESULT OF SELECTING InterfaceFLOR® MODULAR CARPET... THE PROJECT RAN SMOOTHLY WITHOUT ANY INTERRUPTION TO OUR OPERATIONS."*

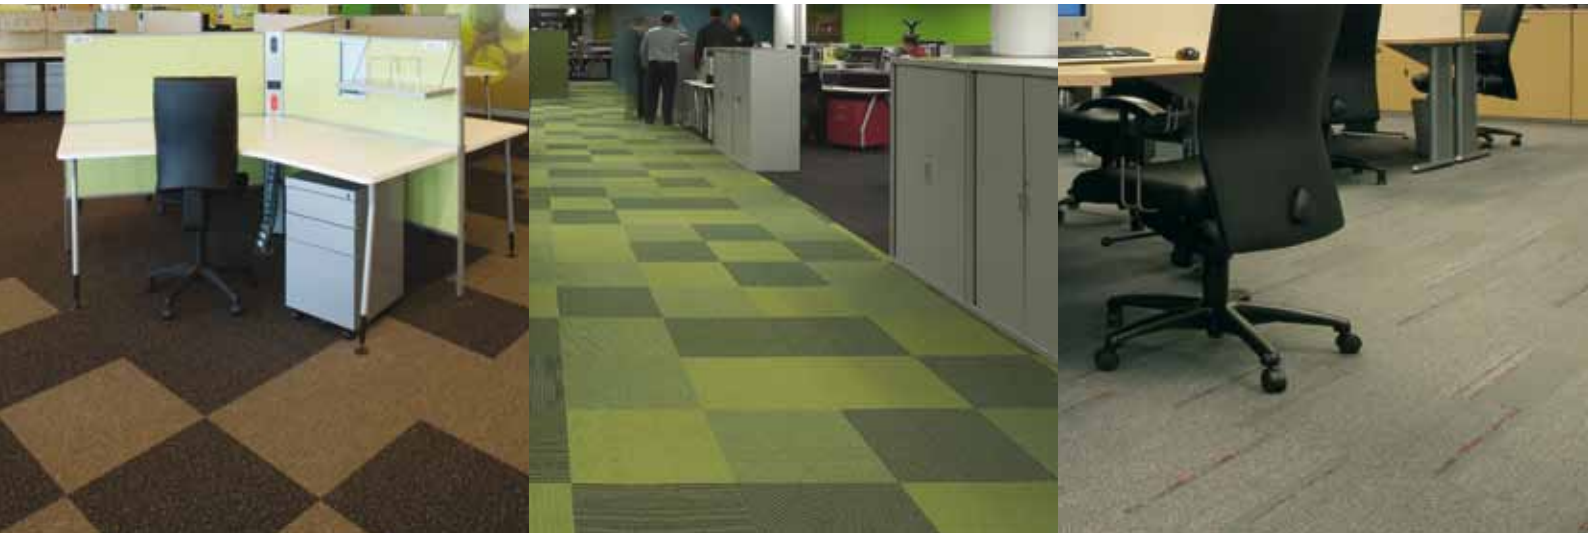

**Brian Scouler,**  
Specialist Facilities and Services,  
Accenture Australia.

## WORKS FOR YOU. WORKS FOR YOUR TENANTS.

With InterfaceFLOR, you can be confident you're creating an environment that's attractive to your tenants.

For a start, you can give any of your properties a fresh, new look virtually overnight – by choosing from our wide range of attractive and stylish modular designs.

Similarly, you can let tenants know that you are providing a safe and healthy environment for their workers. Our modular carpets are also designed to minimise allergies - and have gained Sensitive Choice approval from the National Asthma Council. Our proprietary antimicrobial product, Intersept®, is also included in our modular carpet products and adhesives – to help prevent the growth of a broad spectrum of moulds, mildew, bacteria and nasty, odour-causing microorganisms.

REVITALISE YOUR BUILDING ASSETS FOR HALF THE COST.
