

InterfaceFLOR's SYSTEM 6+ is used to create an impervious flooring solution suitable within environments where water based spills are common. It protects the substrate from moisture penetration and prevents odours and bacterial contamination of the sub floor. To ensure an impervious flooring solution SYSTEM 6+ must be installed with the following components:

1. InterfaceFLOR GlasBac® and GlasBac®RE 1m x 1m Carpet Sheet
2. InterfaceFLOR branded Seam Sealer
3. InterfaceFLOR branded Floor Sealer
4. Optional – Intertac® adhesive (exclusive to InterfaceFLOR – contains Intersept® antimicrobial)

**NOTE: This specification sheet is to be used in conjunction with individual product specification sheets.**

***Technical Specifications***

<b>CARPET</b>	InterfaceFLOR 1m x 1m GlasBac® and GlasBac®RE modular carpet sheet See Product Specification sheets for full details.
<b>SEAM SEALER</b>	InterfaceFLOR GECA Approved Water Based Seam Sealer Material Safety Data Sheets available on request.
